Revolutionary method for effective treatment of your problem areas.  
**MORE INTENSE - FASTER - MORE SUCCESSFUL**

Reduce weight as easy as never before.

It's possible to lose 13-22 lb. in just 4 weeks.

## Infrared in conjunction with exercise and light therapy

In medicine, infrared light has been an established remedy a long time ago.

Doctors, for example, use infrared light to mitigate pain in muscles and joints and to accelerate the progress of healing. With our devices G400 and G400 Vario we combine this healthfully effect with equipment for fitness.

This absolute innovative and revolutionary method gets your body in shape very fast! No other training is so effective in treating your problem areas (e.g. belly-legs-buttocks-training, saddlebags). It's safe to assume, that it's possible to lose 13-22 lb. in just 4 weeks. One workout is comparable to the calorie consumption of 15 km running, the warming of the body even a run of 30 km. The body burns around 2.000 calories every workout.

The integrated light therapy is used, to improve the state of mind and has an impact of these with the specific application of colors:

- Purple: Immune strengthening, usable for lymph edema
- Blue: Relieves tensions and pain
- Green: Positive effect for bronchia and lungs
- White: Supports the production of vitamin D, conduces healing
- Yellow: Has a balancing effect on stomach and intestinal disorders
- Orange: Gives vitality
- Red: Stimulates blood circulation and metabolism
